Profile

I am a hardworking and motivated Software Developer who can be flexible, and adapt to any work condition or team, I am now looking to apply what I have learnt in my education. I aim to improve and take any team I am a part of to the next level by ensuring everything assigned to me will be done efficiently, and on time to the company's full standard. I also make sure I improve every day by challenging myself by completing one problem daily on LeetCode.

Education

Frontend Developer Bootcamp Frontend Simplified

June 2022 – March 2023

Through this course, I expanded my knowledge of HTML, CSS and React and learnt useful techniques such as Flexbox to keep a website responsive, and accessible from multiple devices. I also learnt JavaScript and how to implement it to the website to make the websites more interactive as well as using JavaScript to access data from an API.

Computer Science at the University of Kent

2020 – 2022

Studied the following relevant modules:

- Introduction to Object-Oriented Programming
- Further Object-Oriented Programming
- Problem-Solving with Algorithms
- Databases and the Web
- Software development

I also had a few group projects where we would have two scrum meetings a week to get us custom to a business environment. This is only to name a few things I learnt, however, all modules can be seen under the course structure on the university's [website](#) (Stage 1 and Stage 2).

The Elmgreen School Sixth Form

2018-2020

For A-levels, I studied Computer Science, Psychology, and Portuguese.

The Elmgreen School

I have a total of 9 GCSEs all A-C. This includes Maths, English lang, English lit, and Computer Science.

Skills

Over my years studying Computer Science and coding I have picked up fundamental skills to become a software engineer. These skills include languages such as Java, HTML, C++, JavaScript, C++, Python, and SQL, as well as learning some frameworks such as React and Pygame. I also have used NPM, Git, Firebase and GitHub to improve my code or share code with co-workers.

Hobbies

My favourite hobby is playing volleyball, a very intense sport which requires coordination and teamwork. I started playing volleyball when I was 15 years old in secondary school, winning gold medals every year in the borough tournament and silver medals in U15 and U18s in the London Youth Games. I then proceeded to go to university and be the captain of the university team which required many responsibilities on and off the court.
